

Our nurseries in Notting Hill began in 2002, initially on one site and then spreading to a second site a few yards away. By having two sites our 0-2 year olds have their first experience of nursery in a small, cosy space dedicated to very young children. Around the age of two they then gradually join the older children where there is a large outdoor area. Our staff are hands-on with the children at all times, with the 0-2s the teachers work on the floor at child level.

We have a dedicated, cohesive staff, which stay with us for many years. We do not believe in high staff turnover nor do we use agency staff, the children are able to bond with trusted, well-known adults. Our manager, Ramona has led the team since 2013 and the nursery has stayed with the same family ownership since its start. The owner, Lucy is hands on with the running of the nurseries. We are not a chain !

We love our careers! Children are nurtured and are supported to be the unique individuals they are. They learn in a safe and stimulating environment. Each child is planned for individually and supported to develop into happy, resilient children who are able to express themselves and feel good about who they are. We recognise diversity as a strength and it is embedded in all we do, we are a Stonewall school.

We believe every child is their own person and see the role of a nursery to be to help them blossom into the person they wish to be. We help develop happy, emotionally secure children and prepare them for the next stage of education.
